

Restoration, Palaeographical Knowledge Bases and Classification of Letter-forms

Peter A. Stokes

[illegible]

‘How to organize and access
palaeographical knowledge in
order to use it as **evidence** in an
emerging interpretation.’

‘[Palaeographers] are all too often regarded as repositories of authoritative dogma.’

D. Ganz [Prof. of Palaeography, KCL],
‘Editorial Palaeography’, *Gazette du livre médiéval* 16 (1990), p. 11

‘[Palaeography is] an authoritarian discipline, the pertinence of which depends on the authority of the author and the faith of the reader.’

A. Derolez [Prof. Emeritus, President *CIPL*],
The Palaeography of Gothic Manuscript Books (2003), p. 9

‘It is **obvious** that one **cannot prove** that two texts were penned by the same hand. The only way to persuade other people that this is so is to **show** them, to **give them the feeling** that it is the same hand.’

C. Sirat, *Writing as Handwork* (2006), p. 493

‘The dating and localizing of most manuscripts will **always** be informed **guesswork**.’

Ganz, ‘Editorial Palaeography’, p. 11

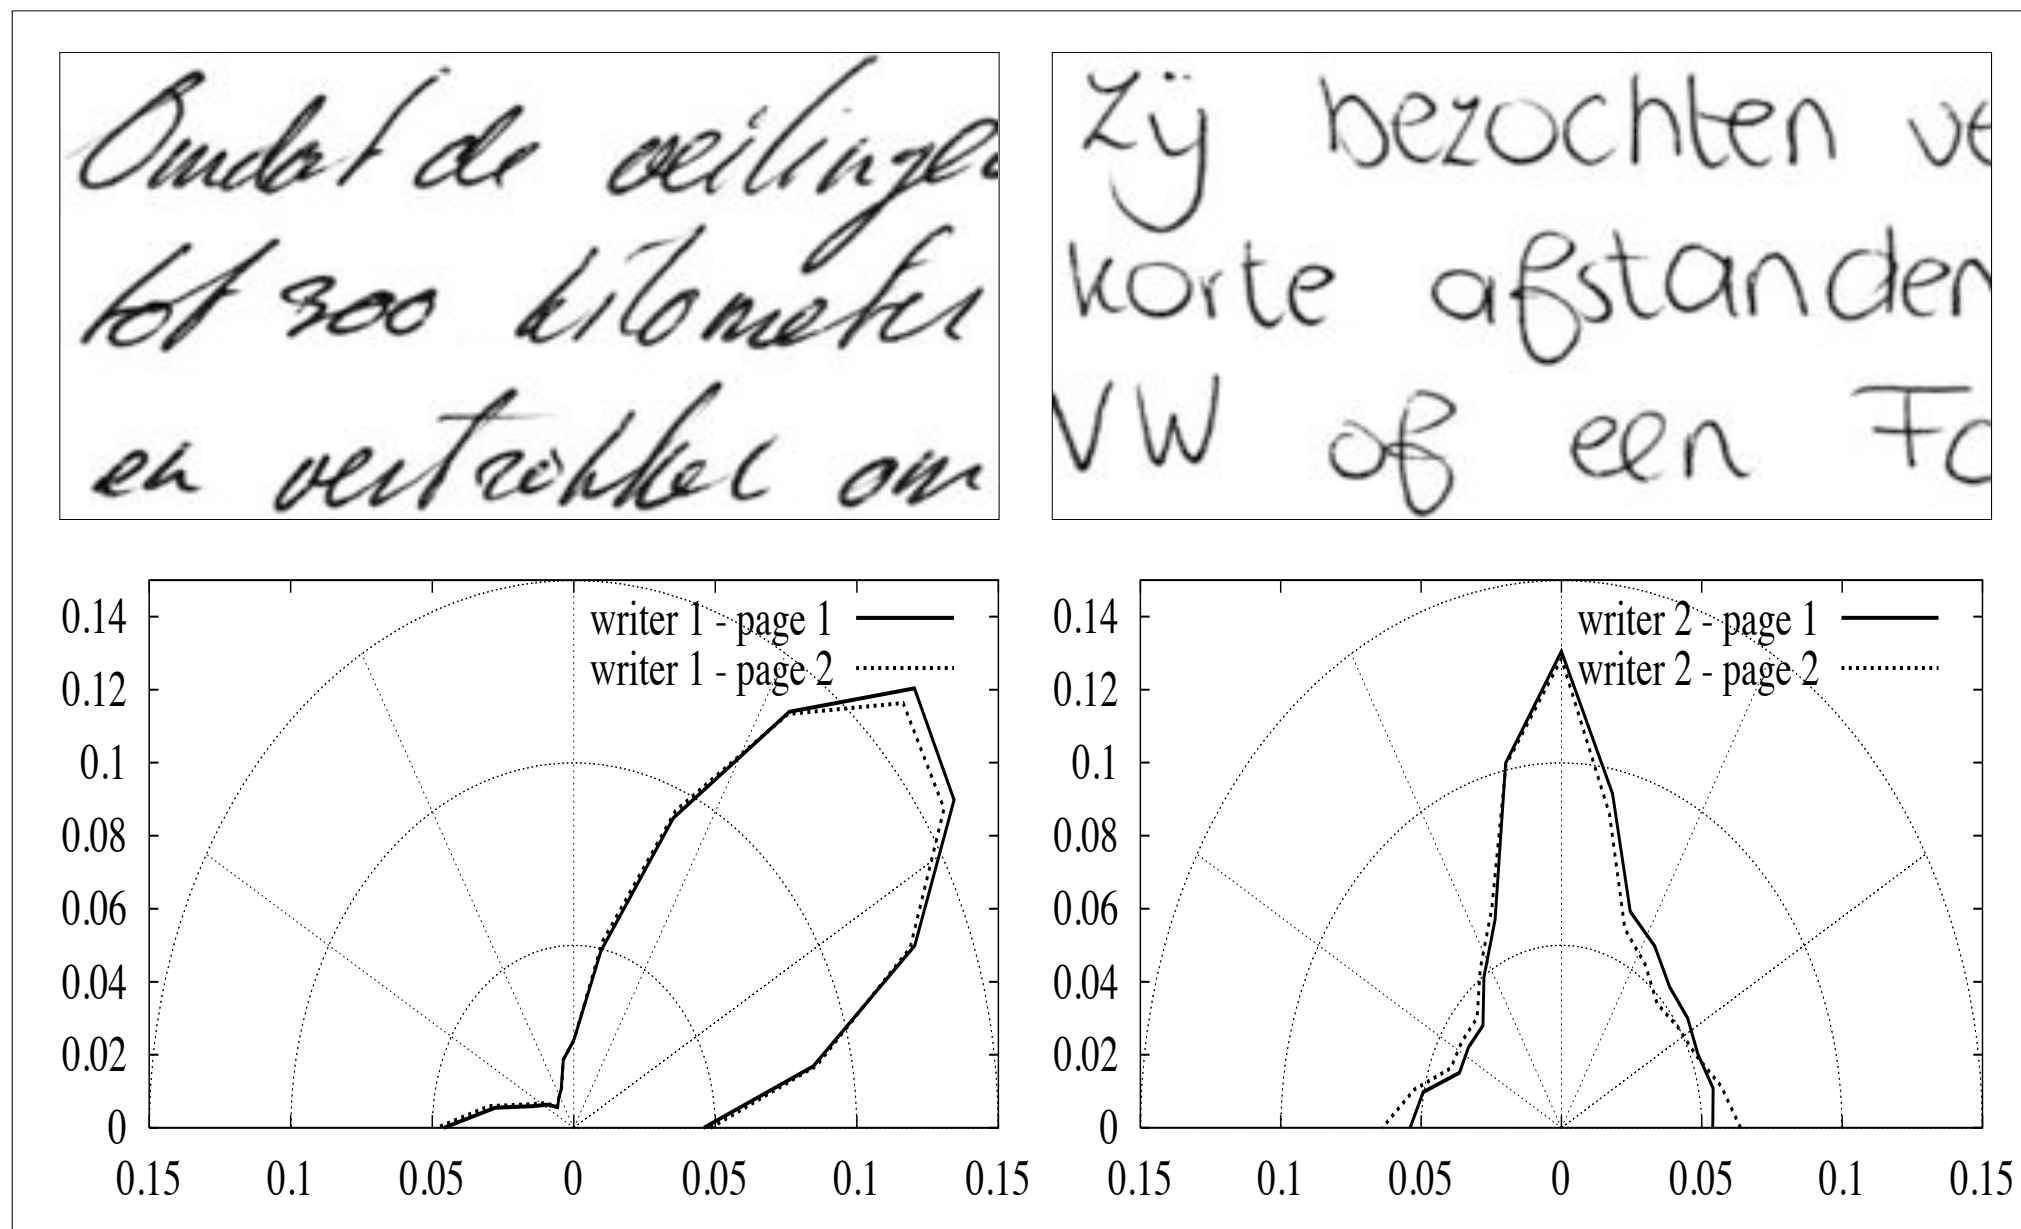

‘... the **low esteem** in which palaeography is currently held as an academic discipline...’

Derolez, *The Palaeography* (2003), p. 2

‘How is it possible to proceed in such a way that the description of a specimen of handwriting is as **clear and convincing** to its reader as it is to its author? An obvious answer is: by replacing qualitative **data** by quantitative ones.’

Derolez, *The Palaeography* (2003), pp. 7–8

Computational Palaeography?

Bulacu, Schomaker and Vuurpijl, 'Writer Identification',
Proc. 7th ICDAR (2003)

Computational Palaeography?

‘These [computational] methods are unlikely to replace, though they may supplement, the work of the document analyst,’
because, however powerful computers will (surely) become, **it will probably not be possible to cross-examine them.**’

T. Davis, ‘The Practice of Handwriting Identification’,
The Library (2007), p. 266 n. 27

Palaeographical Databases?

Decision Support System

- ‘This system will guide the users, record their decisions, and enable them to track their previous hypotheses and decisions.’
- ‘It will ... [provide] **tools** for word-searches and for **character recognition**.’
- ‘[I]t is important to have knowledge bases of phrases, words or **letter-forms** from which to draw comparisons.’

Problems with Databases

1. How do we search for letter-forms?
2. How do we deal with image rights?
3. How do we ensure sustainability?

Bodleian Auct. D.2.16, 1r (detail)

‘If we are really to capitalize on the potential that the digital scriptorium seems to guarantee ... the **blurriness** of palaeography and its organizing principles might usefully be appraised and considered carefully with a view to **eliminating the widespread variability of description and the arbitrariness of evaluative analysis.**’

E. Treharne, ‘The Good, The Bad, The Ugly’ (forthcoming)

MANCASS C11 Database Project

An Inventory of Script and Spellings in Eleventh-Century English, an [AHRB-Funded](#) Project

Director: Prof. Donald Scragg

Co-Director: Dr Alexander Rumble

Research Fellow: Dr Kathryn Powell

Research Associates: Dr Susan D. Thompson, Dr Joana Soliva,

Project Secretary: Mary Syner, MA

Technical Officer: Dan Smith

Contributors: Joanna Clatworthy, Prof. Jill Fredrick (University of Minnesota, Moorhead)

Advisory Board: Prof. Mechthild Gretsch (University of Göttingen), Prof. Simon Keynes (Trinity College, Cambridge), Dr Margaret Laing (University of Edinburgh), Prof. Elaine Treharne (University of Leicester)

Acknowledgements

The project gratefully acknowledges the support of the University of Manchester Faculty of Arts; the co-operation of Prof. Antonette di Paolo Healey and the University of Toronto's Dictionary of Old English Project; the estate of Prof. Peter Clemoes for the contribution of his collations of Ælfric's First Series of Catholic Homilies; and the University of Göttingen for the contribution of digitized material from N. R. Ker's Catalogue of Manuscripts Containing Anglo-Saxon.

We gratefully acknowledge the kind permission of the University of Michigan Press to show adapted passages from [The Dictionary of Old English Corpus in Electronic form](#), by Antonette di

A ‘confusing patchwork of policies [for image rights which] ... is hindering new research and publication in the humanities.’

Max Planck Institute, *Call for Open Access* (2009)

Where to from here?

Any evidence must be:

- Reproducible
- Communicable (and communicated)
- Debatable
- (Ideally) verifiable

Where to from here?

- One resource which unites existing catalogues, databases, digitised MSS.
- Includes a database which allows searching by letter-form, with photographs of letters and links to complete online MSS.
- Ideally, allows users to add and share information.
- Must be extensible, flexible, modular, standards-compliant, and especially *human-centred*.
- The ‘hard’ technology is already here:
the challenge is with *us*.

*Thanks to the Leverhulme Trust
and the Isaac Newton Trust
for funding this research.*
